

PHILIPS

Clinical Education

Making the most of your investment **Ultrasound Clinical Education**

Philips offers comprehensive online clinical education packages that are designed to support clinical excellence, increase use of advanced system features, instill physician confidence in the quality of exams, enhance workflow and productivity, and foster professional growth and teamwork – ultimately, to deliver an outstanding patient experience.

These ASRT-approved modules are self-paced tutorials consisting of enlightening content and colorful images. There are no prerequisites for these courses.

We are pleased to offer three NEW e-learning curriculums focusing on obstetrical & gynecological ultrasound examinations.

This eLearning bundle focuses on Obstetrical and Gynecological ultrasound imaging according to established standards and guidelines. This series includes image optimization, required views, measurements and anatomy and an overview of the basics of volume imaging.

Image Optimization For OB-GYN Exams (1 CEU)

This course is designed for ultrasound technologists to learn essential image optimization techniques when performing Obstetrical and Gynecologic ultrasound exams. Topics covered include a review of the various imaging modes, adjustment of basic and advanced technical features, Color Flow Imaging and Pulsed Wave Doppler.

Volume Imaging Basics for OB-GYN Exams (.75 CEU)

This course will provide an overview of Volume Imaging basics as it applies to Obstetrical and Gynecologic ultrasound. Topics covered include a review of the benefits, acquisition methods and manipulation of volumes images.

Performing an Obstetrical Ultrasound (1.5 CEU)

This course will provide an overview of the fundamentals of performing an obstetrical ultrasound for the first trimester along with the second and third trimester. Topics covered include a review of the required views, measurements and fetal anatomical structures.
